EDUCATION

IED - ISTITUTO EUROPEO DI DESIGN

Two years PTP in Web Design, 110 cum laude.
Thesis project Adidas Video Hacking.

CAMBRIDGE ASSESSMENT

C2 Proficiency in English - Grade A.

UNIVERSITY OF PARMA

Computer Engineering, degree not obtained.

SCIENTIFIC HIGH SCHOOL DIPLOMA

Born in Italy in the Emilian mountains, I have lived in Reggio Emilia since 2022.

Always curious and creative, I started programming in high school and haven't stopped since.

Over the years, I've worked on projects of increasing complexity, exploring new tools and refining my approach.

Today I focus on front-end development and interface design, backed by a solid full-stack foundation that allows me to view every decision through a technical lens as well.
I bring a people-oriented approach to both client relationships and user experience design.

AI-POWERED WORKFLOW

Tools like Claude Code are an integral part of my daily workflow.

I maintain full ownership of the architecture and quality of the product and I'm convinced that the potential of AI agents is best expressed in the hands of those who have the skills to understand their limitations and critically evaluate the output.

Curiosity does the rest: it transforms the power of the tool into a continuous source of learning and professional development.

OUTSIDE THE OFFICE

In my free time, I enjoy cycling, preferably on vintage bikes with 1970s-style clothing.

I am a volunteer Italian teacher for foreigners, a former first responder for the Croce Verde, and a volunteer in other contexts. Among other things, I participated in a delegation visiting a Syrian refugee camp in Lebanon.

Many things that usually don't make it onto a CV, but are part of me.

HARD SKILLS

UX-UI DESIGN AND FRONT-END PROGRAMMING

User experience design, interface design and programming. Proven experience in HTML, CSS, and Javascript/Typescript. Familiar with SVG animations and the construction of functional, accessible, and semantic interactive elements (WCAG guidelines and SEO).

BACK-END AND FULL-STACK PROGRAMMING

Development and extension of web applications and APIs. Strong experience in PHP, Javascript/Typescript, and SQL. Occasional use of other languages (Python, C++). Language-agnostic approach focused on separation of concerns and maintainability. Basic experience in managing Linux servers, domains, SSL certificates, and deployment.

FRAMEWORKS, CMS, LIBRARIES, SOFTWARE TOOLS

Wordpress, WooCommerce, Laravel, Vue.js (Nuxt), Tailwind, GSAP, occasionally Angular. Visual Studio Code, GitHub, Docker, Postman, Adobe CC, Figma, Claude Code.

SOFT SKILLS

I believe in **teamwork** and am happy to dedicate time and resources to supporting my colleagues.

Having worked full-remote for 4 years at the beginning of my career I'm used to **organizing** myself independently, even though **interaction with the team** remains invaluable for me.

I relate to customers naturally, combining **professionalism** and **human warmth**.

I authorize the processing of the data contained in this document pursuant to Legislative Decree 196 of June 30, 2003, and Article 13 of the GDPR.
